

# 10 Lines On International Tiger Day

 [10linesabout.com/10-lines-on-international-tiger-day/](https://10linesabout.com/10-lines-on-international-tiger-day/)

June 21, 2025

Read 10 lines on International Tiger Day to understand why we celebrate and protect tigers. Perfect for students and easy class projects.

Have you ever wondered why tigers are so important to our planet? Why do we dedicate a whole day to them every year? The answer is simple – tigers are not just beautiful animals, they are also key to keeping forests healthy. **International Tiger Day**, celebrated on **29th July**, reminds us how close tigers are to disappearing forever.

More than 100 years ago, there were over **100,000 tigers** in the wild. Now, only around **3,900 wild tigers** remain. This sharp drop happened because of **poaching, illegal trade**, and the loss of forests. Without action, these powerful creatures could vanish from the wild.

This day started in **2010** at the Saint Petersburg Tiger Summit, where 13 tiger-range countries joined hands to save them. The goal was clear — to **double the tiger population by 2022**.

India plays a big role in this. It has **over 70% of the world's wild tigers**, and many projects like Project Tiger help protect them.

International Tiger Day is a wake-up call for everyone. Tigers need our help now more than ever. If we lose them, we lose a big part of nature too. Let's understand why they matter and what we can do to help.

## Points of International Tiger Day

---

**International Tiger Day** (also called **Global Tiger Day**) is observed every year on **July 29** to raise awareness about tiger conservation. Key points:

- Celebrated on **29th July** every year.
- Aims to **protect wild tigers from extinction**.
- Highlights the **declining tiger population** and habitat loss.
- Encourages governments, communities, and individuals to act.
- Launched during the **St. Petersburg Tiger Summit** in **2010**.
- Goal: **Double the tiger population by 2022** (TX2 goal).
- Promotes the protection of **tiger habitats** and forests.
- Urges action against **poaching and illegal trade**.
- Supported by organizations like **WWF, UNDP, and Wildlife Conservation Society**.
- Reminds us that saving tigers also saves ecosystems.

## 10 Lines About Tigers

---

1. The tiger is a wild animal and a powerful predator.
2. It is the **national animal of India**.
3. Tigers have **orange fur with black stripes**.
4. They are found in forests, grasslands, and mangroves.
5. Tigers are **carnivores** and eat other animals like deer.
6. They are excellent swimmers.
7. Each tiger has **unique stripe patterns**.
8. The Bengal tiger is the most common species in India.
9. Tigers are **endangered due to poaching and habitat loss**.
10. We must protect tigers to maintain ecological balance.

## 10 Facts About Tigers

---

1. Tigers are the **largest wild cats** in the world.
2. A tiger's roar can be heard from **up to 3 km away**.
3. There are **six living subspecies** of tigers.
4. They are **solitary animals** and prefer to hunt alone.
5. Tigers can run up to **60 km/h** for short distances.
6. They are good swimmers and enjoy water.
7. **White tigers** are not a separate species; they have a genetic mutation.
8. Their stripes help them **camouflage in the forest**.
9. Female tigers give birth to **2–4 cubs** at a time.
10. Less than **4,000 wild tigers** remain in the world today.

## How to Save Tigers – 10 Lines

---

1. **Stop deforestation** to protect tiger habitats.
2. Enforce **strict laws against poaching**.

3. Increase awareness about **tiger conservation**.
4. Support and fund **wildlife sanctuaries** and reserves.
5. Promote **eco-friendly tourism** that supports conservation.
6. Ban the **illegal trade** of tiger skins and body parts.
7. Educate people in villages near tiger habitats.
8. Use **technology like camera traps** to track tigers.
9. Plant more trees and restore forests.
10. Support organizations working to **save tigers**.

## 20 Interesting Facts About Tigers

---

1. Tigers are **apex predators** – no natural enemies.
2. They can weigh up to **300 kg (660 lbs)**.
3. Tigers' saliva has **healing properties**.
4. They mark territory with **urine and scratch marks**.
5. Tigers are mostly **nocturnal** (active at night).
6. They can **leap up to 10 meters** in a single bound.
7. A tiger's **paws are soft**, helping them move silently.
8. Tigers communicate by **roaring, growling, and scent marking**.
9. Cubs are **born blind** and rely on their mother.
10. Tiger populations have declined by **over 90% in 100 years**.
11. **Bengal tiger** is the most numerous in the wild.
12. **Siberian tigers** are the largest subspecies.
13. Tigers have a lifespan of about **10–15 years in the wild**.
14. **Males are larger** than females.
15. They use their **tail for balance** while running.
16. A tiger's bite can **crush bones**.
17. **Panthera tigris** is the scientific name.
18. They can eat **up to 40 kg of meat** in one meal.
19. Tigers are featured in many **myths and cultural stories**.
20. Saving tigers also saves the **entire forest ecosystem**.

International Tiger Day is observed every year on **29th July** to raise awareness about the urgent need to protect tigers and their natural habitats. This global initiative reminds us of the declining tiger population and the importance of wildlife conservation.

1. International Tiger Day was first celebrated in 2010 at the Saint Petersburg Tiger Summit.
2. It aims to promote a global system for protecting tigers and their ecosystems.
3. The day highlights the alarming fact that tigers are an endangered species.
4. Only around 3,900 wild tigers are left in the world today.
5. India is home to over 70% of the world's tiger population.
6. Poaching and habitat loss are the biggest threats to tigers.
7. On this day, awareness campaigns and conservation programs are held worldwide.
8. Governments and organizations work together to double the tiger population.

9. Protecting tigers helps maintain a healthy and balanced ecosystem.
10. Everyone can contribute by spreading awareness and supporting wildlife protection efforts.

## 100 Words Essay on International Tiger Day

---

International Tiger Day is celebrated every year on **July 29** to raise awareness about tiger conservation. Tigers are endangered due to habitat loss, poaching, and illegal wildlife trade. This day reminds us of the importance of saving tigers to maintain ecological balance.

Governments and wildlife organizations around the world work together to protect tiger habitats and increase their population. In India, efforts like **Project Tiger** have helped protect this majestic species.

Tigers play a crucial role in the food chain and biodiversity. On this day, we must pledge to protect tigers and their forests for future generations.

## 150 Words Essay on International Tiger Day

---

International Tiger Day is observed annually on **July 29** to create awareness about the need to conserve tigers and protect their natural habitats. The day was established in 2010 during the Saint Petersburg Tiger Summit in Russia, where leaders of 13 tiger-range countries pledged to double the tiger population by 2022.

Tigers are a vital part of our ecosystem. However, they face serious threats from poaching, illegal wildlife trade, deforestation, and habitat destruction. Today, only a few thousand tigers remain in the wild.

India is home to over 70% of the world's tiger population and has made strong efforts through initiatives like **Project Tiger** and **National Tiger Conservation Authority (NTCA)**.

International Tiger Day serves as a reminder that the survival of tigers is in our hands. It encourages individuals, organizations, and governments to work together to save this magnificent species and protect our planet's biodiversity.

## 200 Words Essay on International Tiger Day

---

**International Tiger Day**, celebrated every year on **July 29**, aims to raise global awareness about the declining population of tigers and to promote their conservation. The day was founded in **2010** at the **Saint Petersburg Tiger Summit**, where 13 countries committed to doubling the number of wild tigers by 2022 under the **TX2** goal.

Tigers are not just beautiful animals; they are apex predators and play a crucial role in maintaining the ecological balance. Sadly, due to human activities such as illegal poaching, habitat destruction, and climate change, their numbers have declined drastically over the past century.

From nearly 100,000 tigers a hundred years ago, the population has dropped to around 4,000 in the wild today.

India, which holds the majority of the world's tiger population, has taken strong conservation steps, such as launching **Project Tiger** in 1973 and creating protected tiger reserves. These efforts have seen success, with tiger numbers increasing in recent years.

International Tiger Day reminds us that protecting tigers also means protecting forests, rivers, and other wildlife. It is a day to educate people, especially the younger generation, about the importance of wildlife and to inspire action toward saving one of nature's most magnificent species.

### 300 Words Essay on International Tiger Day

---

**International Tiger Day**, also known as **Global Tiger Day**, is celebrated every year on **July 29** to raise awareness about the urgent need to protect tigers and their habitats.

It was first observed in **2010**, following the **Tiger Summit held in Saint Petersburg, Russia**, where leaders of 13 tiger-range countries came together to pledge efforts to double the number of wild tigers by 2022, a goal called **TX2**.

Tigers are at the top of the food chain and play an important role in maintaining the balance of the ecosystem. However, due to deforestation, human encroachment, poaching, and illegal wildlife trade, tigers have become endangered. In the early 20th century, there were over 100,000 tigers in the wild, but today that number has fallen to around 4,000 globally.

India is home to the largest number of tigers in the world and has taken significant steps in their conservation. Initiatives like **Project Tiger** (launched in 1973), **Tiger Reserves**, and the establishment of the **National Tiger Conservation Authority (NTCA)** have contributed to increasing the tiger population in recent years. As per the 2018 tiger census, India had 2,967 tigers.

International Tiger Day serves as a reminder that tigers are not just a national pride but a symbol of biodiversity and environmental health. Saving tigers means saving forests, water sources, and countless other species that share the same habitat.

This day encourages people, especially students and wildlife lovers, to spread awareness, support conservation programs, and act responsibly towards nature. It is our collective duty to protect tigers, not only for ecological reasons but also to preserve a majestic species for future generations.

## 500 Words Essay on International Tiger Day

---

**International Tiger Day**, celebrated every year on **July 29**, is a global initiative to raise awareness about the importance of tiger conservation. The day was launched in **2010 at the Saint Petersburg Tiger Summit in Russia**, where 13 tiger-range countries pledged to work toward **doubling the tiger population by 2022**. This ambitious goal was called **TX2**.

Tigers are among the most iconic and majestic animals on Earth. They are apex predators and play a vital role in maintaining the ecological balance of the forests. Unfortunately, over the past century, their numbers have drastically declined.

From an estimated 100,000 tigers in the wild in the early 20th century, only around 4,000 remain today. Major threats to tigers include **poaching, illegal trade in tiger body parts, habitat destruction, human-wildlife conflict, and climate change**.

India is home to more than 70 percent of the world's tiger population. The country has taken multiple initiatives to protect this magnificent species. **Project Tiger**, launched in 1973 by the Government of India, marked a major step in tiger conservation.

Since then, many **tiger reserves** have been created across the country. According to the 2018 All India Tiger Estimation, India had **2,967 tigers**, showing a significant increase in numbers compared to previous years.

**International Tiger Day** is not just about celebrating the animal but also about creating awareness. It provides a platform for conservationists, wildlife organizations, and governments to share progress, highlight challenges, and call for public support.

Events such as educational programs, wildlife documentaries, campaigns, and forest walks are organized on this day to inspire people to act.

See also [Amazing 10 Lines On Dog In English](#)

Tigers are umbrella species, meaning that protecting them also protects many other species and the entire ecosystem they inhabit. Conserving tigers ensures that forests remain healthy and water sources stay clean.

The future of tigers depends on responsible human actions. This day reminds us that the survival of tigers is closely linked with the survival of the planet. Everyone, from school children to world leaders, has a role to play in this effort.

## 1000 Words Essay on International Tiger Day

---

**International Tiger Day**, also known as **Global Tiger Day**, is observed every year on **July 29** to raise awareness about the endangered status of tigers and promote efforts toward their conservation.

Tigers are one of the most majestic and powerful animals in the wild, often referred to as the symbol of strength and courage. However, over the past century, their population has seen a sharp decline due to various human-made and natural causes.

International Tiger Day aims to highlight these challenges and bring people together in the mission to save this magnificent species.

## Origin and Significance

---

The day was first observed in **2010**, following the **Saint Petersburg Tiger Summit** in Russia. At this summit, leaders from **13 tiger-range countries** came together to express concern over the falling population of tigers worldwide.

They made a historic pledge to **double the number of wild tigers by the year 2022**, an initiative known as **TX2**. This was a landmark moment in global wildlife conservation, signaling a united front against threats to tigers and their habitats.

The day is not just a celebration but a serious reminder of what is at stake. It encourages governments, conservationists, wildlife enthusiasts, and the general public to take action. It is a platform to review conservation strategies, share success stories, and push for policy and community support.

## The Importance of Tigers in the Ecosystem

---

Tigers are apex predators, which means they sit at the top of the food chain in the forest ecosystem. They play a vital role in maintaining the **balance of nature**.

By preying on herbivores like deer and wild boars, they help control the population of these animals, which in turn ensures that vegetation is not overgrazed. This balance supports biodiversity and the health of the entire ecosystem.

Furthermore, tiger conservation contributes to the protection of large areas of forest, which are not just homes to tigers but also to numerous other species. These forests provide clean air, water, and climate regulation — vital for all forms of life, including humans.

## Threats to Tiger Survival

---

Tigers once roamed freely across Asia, from Turkey to eastern Russia. However, their range has shrunk drastically, and their population has declined by over **95% in the last century**. Some of the key threats to tigers include:

### Poaching and Illegal Wildlife Trade

---

Tigers are killed for their bones, skin, and other body parts, which are used in traditional medicines and sold in illegal markets. Despite strict laws, poaching remains a serious threat.

### Habitat Loss and Fragmentation

---

As forests are cleared for agriculture, development, and human settlements, tigers lose their homes. Fragmented habitats also make it difficult for them to find prey or mates, leading to inbreeding and conflict.

### **Human-Wildlife Conflict**

---

When tigers stray into villages or livestock areas in search of food, they are often killed in retaliation. Such conflicts are rising due to shrinking habitats.

### **Climate Change**

---

Changes in temperature and rainfall patterns, especially in sensitive areas like the Sundarbans (home to the Royal Bengal Tiger), are affecting tiger habitats.

### **Tiger Conservation in India**

---

India is home to **over 70% of the world's tiger population**, making its role in tiger conservation globally significant. The Indian government has taken several initiatives to protect tigers and their habitats:

#### **Project Tiger**

---

Launched in **1973**, this was one of the most ambitious wildlife conservation programs in India. Its goal was to protect Bengal tigers from extinction and preserve the natural habitat.

#### **National Tiger Conservation Authority (NTCA)**

---

Established in 2005, this body provides statutory authority to implement Project Tiger, monitor reserves, and ensure tiger-friendly policies.

#### **Tiger Reserves**

---

India now has **more than 50 tiger reserves** across different states, where hunting is banned and habitats are protected.

#### **All India Tiger Estimation**

---

Conducted every four years, this is one of the world's largest wildlife surveys. According to the **2018 census**, India had **2,967 tigers**, an increase from 1,411 in 2006.

These efforts, along with community engagement and better forest management, have shown positive results in increasing tiger numbers in India. However, continued efforts are essential to sustain and improve this trend.

### **Global Conservation Efforts**

---

Apart from India, several international organizations and countries are actively involved in tiger conservation:

- **WWF (World Wide Fund for Nature):** WWF works with governments and communities in tiger-range countries to reduce poaching, protect habitats, and stop illegal wildlife trade.
- **Global Tiger Forum (GTF):** An intergovernmental body focused on preserving tigers in the wild.
- **CITES (Convention on International Trade in Endangered Species):** Regulates international trade of tiger parts to ensure it does not threaten their survival.
- **Protected Area Networks:** Many countries have created national parks and sanctuaries to provide safe environments for tigers to live and breed.

## Role of Communities and Individuals

---

Tiger conservation is not the responsibility of governments alone. Communities living near tiger reserves can play a critical role by protecting forests and reporting poaching activities. Eco-tourism, when managed sustainably, provides income to locals and promotes conservation awareness.

Individuals, especially students and youth, can contribute in several ways:

- **Spread awareness** about the importance of tigers and wildlife protection.
- **Avoid buying products** made from animal skin or bones.
- **Support conservation organizations** through donations or volunteering.
- **Participate in campaigns**, tree plantations, and environmental events.

Education and awareness are key to changing attitudes and ensuring future generations value and protect wildlife.

## Challenges Ahead

---

Despite progress, challenges remain. Forest encroachment, industrial development, mining, and road construction continue to threaten tiger habitats. In some areas, conservation is hampered by lack of funds, political will, or community participation.

See also [Best 10 Lines On Tiger In English](#)

Climate change adds another layer of uncertainty. Rising sea levels and increasing natural disasters threaten ecosystems like the Sundarbans. Long-term conservation requires planning for these new challenges through technology, science, and policy changes.

## Conclusion

---

International Tiger Day is more than a day of awareness; it is a call to action. It reminds us that the survival of the tiger is closely linked to the health of our forests, rivers, and climate. Losing tigers would mean losing a part of our natural heritage and weakening the web of life that supports us all.

The good news is that with coordinated global efforts, tiger populations can recover. India's success shows that strong laws, protected habitats, and public support can make a difference. But we must not be complacent. Every effort, big or small, counts in this mission.

As individuals, we must educate ourselves and others, support conservation efforts, and make conscious choices that protect wildlife. By doing so, we ensure that the roar of the tiger continues to echo through our forests for generations to come.

## National Animal – 10 Lines

---

1. The **tiger** is the **national animal of India**.
2. It represents **strength, courage, and grace**.
3. The tiger is found in many parts of India.
4. It has **orange fur with black stripes**.
5. The **Bengal tiger** is the most famous subspecies.
6. Tigers are **carnivores** and live in forests.
7. They are **solitary animals** and hunt alone.
8. Tigers are endangered due to **poaching and habitat loss**.
9. The government started **Project Tiger** to protect them.
10. We should save tigers to protect our wildlife and forests.

## Very Short Summary of “A Tiger in the Zoo” (Class 10)

---

“A Tiger in the Zoo” by Leslie Norris contrasts the tiger's **natural life in the wild** with his **restricted life in a zoo**. The poem highlights the tiger's loss of freedom, showing how he should roam freely in the jungle but is instead trapped behind bars, quiet and helpless. It reflects on the cruelty of captivity and emphasizes the importance of freedom for all creatures.

## 10 Reasons Tigers Are Endangered

---

1. **Poaching** for skin, bones, and body parts.
2. **Habitat loss** due to deforestation.
3. **Human-wildlife conflict** near villages.
4. **Illegal wildlife trade**.
5. **Climate change** affecting their habitats.
6. **Lack of prey** in forests.
7. **Encroachment** on forest land.
8. **Weak enforcement** of wildlife laws.
9. **Pollution** and habitat degradation.
10. **Loss of genetic diversity** due to shrinking populations.

## Project Tiger (Class 10) – Important Points

---

- **Launched in 1973** by the Government of India.

- Aim: **To protect tigers from extinction.**
- Started with **9 tiger reserves**; now there are over 50.
- Focuses on **habitat protection and anti-poaching.**
- It is a **centrally sponsored scheme.**
- Uses **technology (camera traps, GPS)** for tracking.
- Promotes **community involvement** in conservation.
- Helped **increase tiger population** in India.
- Managed by the **National Tiger Conservation Authority (NTCA).**
- It is one of the **most successful conservation programs** in the world.

## 10 Lines on International Tiger Day in English (General Version)

---

1. International Tiger Day is celebrated on **29th July** every year.
2. It raises awareness about **saving tigers.**
3. Tigers are **endangered species.**
4. The day was started in **2010** at the Tiger Summit.
5. The goal was to **double the number of wild tigers** by 2022.
6. Many countries and organizations take part in this day.
7. Tigers are important to the **balance of nature.**
8. Saving tigers also saves **forests and wildlife.**
9. On this day, people learn how to **protect tigers.**
10. We must act now to **save the tiger before it's too late.**

## 10 Lines on International Tiger Day (Class-wise versions)

---

### For Class 5

---

1. We celebrate International Tiger Day on **July 29.**
2. It helps us learn about saving tigers.
3. Tigers are in danger of disappearing.
4. They are hunted for their skin and body parts.
5. Forests are their home.
6. We must not cut trees.
7. Saving tigers helps all animals.
8. Many countries support this day.
9. We should spread awareness in schools and homes.
10. Let's protect tigers and love nature!

### For Class 4

---

1. International Tiger Day is on **29th July.**
2. It is a day to save tigers.
3. Tigers are wild animals.
4. They live in the jungle.
5. People hunt tigers.

6. We must stop poaching.
7. Tigers need forests to live.
8. They are beautiful and strong.
9. We must save them.
10. Tigers are our pride!

### For Class 3

---

1. Tiger Day is on **29th July**.
2. Tigers are in danger.
3. We must help them.
4. Tigers live in forests.
5. People kill tigers.
6. This is very bad.
7. We should save trees.
8. Tigers need homes.
9. Tigers are strong.
10. Let us save tigers!

### For Class 2

---

1. We celebrate Tiger Day on **July 29**.
2. Tigers are big wild animals.
3. They have black stripes.
4. Tigers live in forests.
5. They are in danger.
6. People hunt them.
7. We must save tigers.
8. Tigers are strong and fast.
9. They are our national animal.
10. Let us love and protect tigers!

### For Class 1

---

1. Tiger Day is on **29th July**.
2. Tigers are big cats.
3. They live in forests.
4. Tigers have black stripes.
5. They eat meat.
6. Tigers are strong.
7. They are in danger.
8. People should not harm them.
9. Save the tiger!
10. Tigers are our friends!

### Save Tiger Slogan Poster (Text Ideas)

---

Here are some slogan ideas you can use to create your own poster:

- “Roar for the Tigers, Before They Are Silent Forever!”
- “No Forest, No Tigers. No Tigers, No Forest.”
- “Save Tigers, Save Nature.”
- “Be Brave, Save the Tiger!”
- “Their Roar is Fading — Act Now!”
- “Tigers are Priceless — Don’t Let Them Go Extinct!”
- “Protect the Stripes, Protect the Wild!”
- “Born to Be Wild, Not in a Cage!”

## Wrap Up

---

Tigers are not just animals. They are symbols of strength, beauty, and balance in the wild. **International Tiger Day** is a special reminder that their future depends on us. Every year on **29th July**, we are called to look at the reality – the tiger is endangered and needs urgent care.

The forests where tigers live also give us clean air and water. If we save tigers, we also save our planet. It’s not just about one animal. It’s about protecting the whole web of life that supports us all.

Thanks to strong steps like **Project Tiger** in India and global support, we have seen small signs of hope. But more work is needed. We must stop cutting forests and punish those who kill or trade tigers illegally.

You can also help. Spread the word. Support wildlife groups. Teach others about the importance of tigers. Even small actions can make a big difference.

In the end, saving tigers is not only about wildlife — it’s about our duty as humans. Tigers cannot speak for themselves, but we can. Let’s promise to protect them before it’s too late.

Every voice counts. Every step matters. Let’s stand together for the tiger, today and always.
